

# OpenMOLE positioning

*Mapping the scientific environment of OpenMOLE*

→ *Citation network at depth 3 from corpus on OML website*

## Done :

- Brainstorming : community-sourced keywords corpus
- Requests list from positioning keywords
- Modifications to the java corpus collector
- Reference collection currently running ( $N = 50$  references,  $K = 18$  requests)

## Remaining :

- Screen the resulting corpus (eyeball validation of titles)
- Construct citation network
- Collect abstracts
- Construct semantic network
- Hypernetwork analyses
